PROJECTS

LORD OF THE RINGS

https://akin-rings.netlify.app

Developed the front-end using HTML, CSS, and JavaScript to display information about characters from the Lord of The Rings series. Ensured the website was easily accessible and responsive.

Integrated the Lord of The Rings API to allow users to search and filter between different characters by name, gender, race, and more. Implemented user interface features such as a responsive navigation menu amongst other exciting features.

Technologies used: HTML, CSS, JavaScript, Lord of The Rings API
